Vineyard sites:	Hillslope rows, planted on ledges for improved vineyard management.

Vineyard management:	Integrated low environmental impact management encourages the grapes to express the territory.
Harvest period:	Decided on the basis of periodic grape tastings and monitoring of sugar, acidity and aromatic ripeness.
Vinification:	Soft pressing with separation of the press fractions. Settling at 14 °C for 24-36 hours. Fermentation in stainless steel tanks at a controlled temperature of 18-20 °C.
